

CLAIMS AS AMENDED

A1 Sub B1  
1. A non-steroidal nasal passage cleaning composition consisting essentially of a salt and water solution, an antiseptic, an analgesic, a mucolytic, a moisturizer and a non-steroidal anti-inflammatory, the composition being a liquid and having a comfortable pH for introduction into the nasal passage.

A2  
3. The composition of Claim 1 wherein the mucolytic is selected from the group consisting of n-acetyl-L-cysteine, potassium alum, zinc sulfate and combinations thereof.

A3 Sub B2  
8. A method of cleaning nasal passages comprising;  
providing a non-steroidal nasal cleaning composition consisting of a salt and water base and containing a mucolytic agent, n-acetyl L-cysteine, and methyl salicylate, an antiseptic, an analgesic, a decongestant, a moisturizer and a non-steroidal anti-inflammatory, the composition being a liquid and having a comfortable pH for introduction into the nasal passages; and,  
applying the liquid composition to the nasal passages.
